## **DETAILED ACTION**

### ***Response to Amendment***

Based on amended claims 17 and 22-23, Arguments of applicant require the following restriction due to different inventions on type of the LCD clearly addressing in these claims.

### ***Election/Restrictions***

This application contains embodiments directed to the following patentably distinct species of the claimed invention:

A. Claims 18 and 21, drawn to the reflective type LCD with a reflective plate disposed on the lower substrate and below the transparent electrode formed on the lower substrate.

B. Claims 19 and 20, drawn to the transfective (semitransparent and semi-reflective) type LCD with a half mirror plate disposed below the lower substrate and above the backlight.

C. Claims 22 and 23, drawn to the reflective type LCD with a reflective electrode forming on the lower substrate.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 17 is generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims and any drawings readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571)
